EDUCATION

Northeastern University - Bachelor of Science in Computer Science

GPA: 3.7/4.0

Relevant Coursework: Object Oriented Programming, Graduate Data Structures and Algorithms, Foundations of Data Science, Artificial Intelligence, Computer Systems, Computer Architecture, Theory of Computation, Public Speaking

SKILLS

Languages & Libraries: TypeScript, React, JavaScript, Tailwind CSS, FastAPI, Node.js, Python, Java, Rust, SQL (PostgreSQL)

Tools: Vercel, AWS, Azure DevOps, Salesforce, Docker, MongoDB, Supabase, Cloudflare, nginx, OpenCV, Gemini, Figma, Claude Code

WORK EXPERIENCE

IBM Sept 2026 - Dec 2026
Incoming Software Engineering Intern Research Triangle Park, Durham, NC

CIBC June 2026 - Aug 2026
Software Engineering Intern Chicago, IL

- Spearheading the discovery and design of critical internal tooling, arranging meetings to identify tedious development bottlenecks for the **Salesforce CRM** and deeply researching **Azure DevOps** architecture to engineer automation solutions utilizing **Python**
- Engineering automated data pipelines using **GitHub Copilot** to feed **Atlassian Confluence** documentation directly into newly initialized **Salesforce Sandboxes**, streamlining both new environment setup and internal data schema management
- Owning the end-to-end development lifecycle through **iterative development**, proactively integrating feedback and leveraging CIBC's internal AI agent to fast-track deployment, successfully shipping features within **two days** and meaningful driving time reductions

HackBeanpot, Inc. Apr 2026 - Present
Software Engineer Boston, MA

- Developing full-stack **authentication** and **global state management** for the hackathon portal, utilizing **Next.js serverless** functions to securely process sign-in workflows and store user data in **MongoDB** for a revamped frontend utilizing **React** and **Tailwind CSS**
- Collaborating within a **30+ member** cross-functional team using **Agile** methodologies and **GitHub Projects** to iteratively build, theme, and deploy hackathon websites and internal tooling

Northeastern University Jan 2026 - Apr 2026
Program Design I Teaching Assistant Boston, MA

- Facilitating weekly office hours and **40+ person** labs, breaking down abstract programming concepts into intuitive explanations
- Guiding **200+ students** through OOP concepts in Python including **inheritance**, **encapsulation**, **polymorphism**, and **unit testing design** as well as **MVC**, **Observer**, **Strategy**, and **publisher/subscriber** design patterns

BobaByte | Hippo Hack May 2023 - Oct 2025
Founder, Lead Organizer Boston, MA

- Led a **12-member team** hosting weekly meetings with check-ins, role ownership, and milestones to ensure success on event day
- Developed a portal with **Node.js** and **MongoDB** backend paired with a **Tailwind CSS** and **JavaScript** frontend, integrating **WebSockets** to support real-time voting and competition operations for 100+ concurrent competitors and staff
- Deployed core competition features for **15 teams** including structured project submissions with titles, demo links, and slideshows along with a live leaderboard and custom voting logic enforcing restrictions defined for the competitions

PROJECTS

Finalog Mar 2026 - Present

- Engineering a full-stack personal finance platform with a **Python REST** backend and the **Gemini API** for intelligent image parsing supporting automated bank statement and receipt ingestion with an intuitive and accessible UX curated with **Claude Code**
- Supporting group expense splitting and P2P debt settlement with WebSockets, achieving an **87% reduction** in manual coordination

Yes Coach! Feb 2026 - Present

- Developing a personal coach overlay for League of Legends, utilizing **PyQt6** for **AI-driven GUIs** and **OpenCV** for game state extraction enabling live tips and feedback designed with an **MVC** design structure streamlining application components
- Engineering efficient translation of high-frequency **Riot Live API** streams into **JSON schemas** for structured LLM **prompt injection**

Rebound - Northeastern ACM Hack Health 2026 First Place Apr 2026

- Built a full-stack injury rehabilitation mobile app using **React Native** and **FastAPI**, featuring daily pain tracking, exercise logging, and a personalized recovery dashboard deployed on **Expo Go** for rapid iteration via **nginx** and **Cloudflare Tunnels**
- Utilized **Supabase Auth JWT's** to secure user connections for injury reporting, daily exercise logging, and voice input with **Gemini**

Languages: English, Mandarin, Korean (in progress)

Interests: basketball, piano, ice hockey, gardening, japanese rock, personal finances
