EDUCATION

Northeastern University - Bachelor of Science in Computer Science - GPA: 3.7/4.0 May 2028 (Expected)
Relevant Coursework: Object Oriented Programming, Graduate Data Structures and Algorithms, Foundations of Data Science, Artificial Intelligence, Computer Systems, Computer Architecture, Theory of Computation, Public Speaking

SKILLS

Programming Languages: TypeScript, JavaScript, Python, Java, Swift, PostgreSQL

Tools: React, FastAPI, Node.js, AWS, Vercel, Docker, Redis, MongoDB, Supabase, Cloudflare, nginx, OpenCV, Gemini, Figma, Claude Code

WORK EXPERIENCE

IBM Sept 2026 - Dec 2026
Incoming Software Engineering Intern Research Triangle Park, Durham, NC

CIBC June 2026 - Aug 2026
Software Engineering Intern Chicago, IL

HackBeanpot, Inc. Apr 2026 - Present
Software Engineer Boston, MA

- Working **cross-functionally** with Design, Operations, and Social teams to **translate organizational needs** into technical features and cohesive user-facing experiences using collaborative tools including **Jira** for ticket tracking and interactive development with **GitHub**
- Collaborating with a 30+ member team to build and deploy a new and improved, revamped and redesigned hackathon portal as well as main-page website using **React**, **TailwindCSS**, **MongoDB**, and **Vercel**

Northeastern University Jan 2026 - Apr 2026
Program Design I Teaching Assistant Boston, MA

- Facilitating weekly office hours and **40+ person** labs, breaking down abstract programming concepts into intuitive explanations
- Guiding **200+ students** through OOP concepts in Python including **inheritance**, **encapsulation**, **polymorphism**, and **unit testing design** as well as **MVC**, **Observer**, **Strategy**, and **publisher/subscriber** design patterns

Oasis at Northeastern Jan 2026 - Apr 2026
Software Development Project Mentor Boston, MA

- Mentoring **two new student teams of 5** building client-facing full-stack web apps using **React**, **TypeScript**, **HTML**, **CSS**, **Supabase**, and **PostgreSQL**, providing technical guidance on architecture, component design, and database schema
- Instructing software engineering best practices utilizing **Git**, **documentation**, **testing**, and **iterative delivery** along with check-ins, helping teams unblock issues in **state management**, **API integration**, **authentication**, and **data consistency**

BobaByte | Hippo Hack May 2023 - Oct 2025
Founder, Lead Organizer Boston, MA

- Led a **12-member team** hosting weekly meetings with check-ins, role ownership, and milestones to ensure success on event day
- Developed a portal with **Node.js** and **MongoDB** backend paired with a **Tailwind CSS** and **JavaScript** frontend, integrating **WebSockets** to support real-time voting and competition operations for 100+ concurrent competitors and staff
- Deployed core competition features for **15 teams** including structured project submissions with titles, demo links, and slideshows along with a live leaderboard and custom voting logic enforcing restrictions defined for the competitions

PROJECTS

Finalog Mar 2026 - Present

- Engineered a Python desktop automation tool using **PyQt6**, leveraging **OpenCV** and custom screen capture routines with an intelligent data pipeline via **Gemini API** for personal financial data processing; maintained as an open-source **PyPI** package providing accessibility
- Optimized personal accounting workflows with **Google Sheets API**, achieving an **87% reduction** in manual logging time

Yes Coach! Feb 2026 - Present

- Developed a personal coach overlay for League of Legends, managing the end-to-end development from Figma design to deployment, utilizing **PyQt6** for **AI-driven GUIs** and **OpenCV** for game state extraction enabling live tips and feedback
- Engineered efficient translation of high-frequency **Riot Live API** streams into **JSON schemas** for structured LLM **prompt injection**

Rebound - Northeastern ACM Hack Health 2026 First Place Apr 2026

- Built a full-stack injury rehabilitation mobile app using **React Native** and **FastAPI**, featuring daily pain tracking, exercise logging, and a personalized recovery dashboard deployed on **Expo Go** for rapid iteration via **nginx** and **Cloudflare Tunnels**
- Utilized **Supabase Auth JWT's** to secure user connections for injury reporting, daily exercise logging, and voice input with **Gemini**

Languages: English, Mandarin, Korean (in progress)

Interests: basketball, piano, ice hockey, gardening, japanese rock, personal finances
